The Clock Goes in One Direction!

As you look at yourself and the people around you, you see that the **clock only goes in one direction, FORWARD**. For more than 35 years the clock was moving forward as thousands of America's industries were downsized or closed and moved around the world.

Most business representatives state that businesses left America to escape rising taxes, regulations and the rising cost of manufacturing. **The tax and regulation issue has now changed in the United States, so we need to see more national elected leaders directing their time and efforts to promoting ways to keep industries and welcome back industries to the United States of America** so millions of additional Americans can be employed.

Today, the American people and American workers are still recovering from the loss of industries and millions of jobs that left the United States for more than 35 years. **Everyone is asked to continue speaking with local, state and national elected officials as well as with store management to voice support for American made products and American workers.**

There is no reason to waste time discussing what should have, could have or would have happened in America. **Let's concentrate all our efforts on ways to support the businesses that manufacture, sell, ship and promote their products in the United States.** Our objective is to get Americans back to work utilizing their present skills and training them for the job opportunities being offered by today's businesses.

As we promote the businesses making and selling products in the United States, forward our message and our Internet address to everyone you know and ask them to forward it to others. Thanks for spreading the word.

Positive Example Equals Positive Results!

As millions of Americans help us to promote the mission of the **Buy American Made Campaign**, we are seeing a growing number of jobs in the United States.

It is without question that it was much easier to create new jobs before outsourcing to foreign countries began because America's industries were fully operational. Today, it is expensive to restore industries and to close the skilled workers gap because America's students were not properly exposed to the job skills needed by all levels of businesses in the United States.

In order to help address the skilled workers gap, we need all supporters to promote the full restoration of Trades and Technology programs in America's schools. This will allow present and future students to know how they can best earn a living by the time they graduate.

After experiencing the results of poor national leadership, we see that it's up to America's consumers to **support American Made so businesses in the United States can offer more employment opportunities** from manufacturing products, advertising, selling, and shipping the products proudly Made in the United States of America.

Kindly spread the word to your family and friends because **Positive Example Equals Positive Results**. Thanks for your participation.
