We Have Reached a Turning Point!

With all of the recent events taking place in America we see changes happening in our great nation. One major change is the focus of the American people on **restoring industries in the United States**

of America that will manufacture, distribute and sell the products Americans most often purchase. For several years, Americans have demonstrated that they want more products originally invented and made in America to be made in America again.

Industries already manufacturing in America are interested in opening new product lines and need you to seek out the American Made Label so they can **expand their product lines** and compete with the foreign made products that have been overwhelming America's stores. 30, 40 and 50 years ago, **when 95% of what was sold in America was American made, there were competitive products in every category competing with other American made products. In 2017 we are struggling to restore American made products** from clothing to electronics, and we see that tens-of-millions of jobs and jobs skills have been lost in the process.

Ten years ago many American people said they were satisfied with the way things were going. **Today Americans see that without a growing number of jobs in every category from small businesses to major manufacturing, America's employment base will remain flat until AMERICA'S CONSUMERS circulate more of their hard-earned dollars on products and services provided by American workers.**

I once again challenge the media, businesses, school districts, elected officials, community organizations and all supporters to **promote our 2017 Campaign Theme "Support The American Made Label"**.

Your participation is very important. Email your comments and suggestions to: **Michael@AmericanWorkersRadio.com**.

In Unity We Are Finding Success!

I want to thank the people that stop me in my travels and send emails to let me know what they are doing to support the **Buy American Made Campaign**. It's always a pleasure to hear how our supporters are speaking up in support of businesses in America and American workers. With your continued participation our efforts to keep Americans employed to making and selling products regularly used by the American people are more positive than ever before.

In the process of promoting our **2017 Campaign theme: "Support The American Made Label"**, we are **seeking to have large numbers of American made items circulated in the United States of America to compete with the overwhelming amount of foreign made items**

that now flood America's stores. Every time you **"Support The American Made Label"** you are helping us to restore the supply chain of American Made products which will allow more jobs to be restored and create long term jobs for American workers. **Speaking up where you shop and circulating more of your hard earned dollars on American made items has helped in more ways than most people realize.**

I once again challenge the media, businesses, school districts, elected officials, community organizations and all supporters to **promote our 2017 Campaign Theme "Support The American Made Label"**. With all the good happening because our supporters are speaking up, 2017, will be a year of positive changes for the better for both American workers and American's economy. Thanks for your participation and for informing me of your efforts. Email your comments to: **Michael@AmericanWorkersRadio.com**.

100% American Made Products

Your Help is Important EVERY Day of the Year!

We all make some type of New Year's Resolutions. **During 2017, you are urged to be part of the Buy American Made Campaign resolution to: "Support the American Made Label"**.

Here are a few ways you can help make this year's theme a success:

- 1. Support the businesses in your community with a focus on those that are featuring a reasonable selection of products made and assembled in the United States of America which provide job opportunities for American workers.**
- 2. Every time you go shopping, pick up each item you're considering to purchase and look at the tags and packaging to see exactly where the items are being made. Be sure to make it a point to let store personnel know that you "Support the American Made Label".**
- 3. Contact your family and friends and ask them to support the Buy American Made Campaign and ask them to promote our 2017 campaign theme: "Support The American Made Label".**

Just these few resolutions will help make a difference for American workers and the businesses that employ them. During the Christmas season, Americans spent billions of dollars on electronics, toys, clothing and hundreds of other gift items which were largely made in foreign countries. With your help we are working to change this unfortunate reality and working toward our goal of **no less than 50% of all products presently sold in America being made by American workers again.**

We all clearly see that America can't continue to be major consumers of foreign made products while American workers are unemployed and job skills needed to expand industries in the United States of America are being lost. **Promoting our 2017 theme "Support The American Made Label" we will get more Americans working again and that's what America needs right now.**

A New Year Creates Many New Opportunities!

Every day things change around us and, **as we begin the New Year, there are many NEW Opportunities for us to UNITE our efforts to support American made products and American workers.**

During 2017, everyone is asked to help us promote the theme: **"Support The American Made Label"**. This theme will help us encourage American based industries to expand their product lines and welcome new businesses to America.

In order to make the **"Support The American Made Label"** campaign a success, it is going to take business leaders, America's consumers, elected officials and American workers to **remain focused on ways to "Support The American Made Label"**.

Read
The
Labels

In recent years millions of people have supported our efforts to **expand the list of items displaying Made in the USA or Made in America labels**. The **"Support The American Made Label" campaign** creates new opportunities for investment in American based industries that will compete with foreign manufacturers.

In order to make this campaign a success, every American needs to get behind our efforts to **"Support The American Made Label"** and allow more of our hard-earned money to be spent on products and services provided by American workers.

Every person who looked at the tags on the holiday gifts they received saw how many of the gift items were made outside of America. We can't dwell on what happened in the past, but we can certainly take action now so we are able to **restore American Made products and have them available again in America's stores. The participation of our supporters has already made a major difference. Help us "Support The American Made Label" by looking for, asking for and purchasing products proudly made in the United States of America.**
