**Restoring Businesses is Our Major Goal!**

Everyone who has worked hard to open a business knows that it takes a lot of effort to get things going. This is the main reason why the **Buy American Made Campaign** has been **urging the American people to support local businesses and seek out products with made in the U.S.A. labels.** Supporting products Made and Assembled in the United States helps business owners remain in business, and keeps Americans employed and adds to the overall well-being of America's economy.

**Help Restore America's Industries  
BUY AMERICAN**

After watching the aftermath of what happened to America because of reduced manufacturing in the

United States, Americans can clearly see how much the loss of employment and spending power has hurt all levels of business, as well as American workers. **It has been especially frustrating for Americans who work hard to get a good education and learn skills they feel will provide them with various employment opportunities.**

After years of the **PROFITS FIRST** mentality, business owners and the American people see that **without a growing employment base in the United States, America's economy cannot sustain a growing population.**

As we work toward being a nation that can produce most of what Americans purchase on a regular basis, we will be able to get **more working-age and able-bodied Americans fully employed,** and allow more American made products to be circulated in the United States of America where we live and need to prosper.

Your participation is very important. Kindly spread the word.

**Global Economy & American Workers!**

With the endless economic changes taking place in countries around the world **FOREIGN MADE PRODUCTS continue to dominate sales in America.** For many years the **Buy American Made Campaign** has been urging the American people to support products and services produced by American workers so we can regain jobs for Americans and expand America's financial security.

**During the last 35 years, America witnessed the departure of thousands of businesses that chose to manufacture their products in foreign countries, then ship them back to the United States for us to purchase.** This process provided jobs for foreign workers while American workers lost their jobs and livelihoods, and poverty grew in the

United States. **Our ongoing focus is to restore the proportion of American made products back to at least 50% so we can have more people employed and also reduce poverty in the United States.**

In order to encourage more businesses to expand their product lines here in the United States and attract businesses that left America to return to the United States, **consumers must change their buying habits and seek out American made products.**

For over 35 years, America became the sales point for foreign products, which has damaged America's economy. When we accomplish a **50-50 balance between American made and foreign made products,** we will see a major positive change in the United States that will benefit today's American workers and those that will enter the workforce in the future.

Your participation is very important. Kindly spread the word.

**Together We Will Make 2021  
a Great Year for American Workers!**

First, best wishes to all and a special THANKS to everyone helping promote the **Buy American Made Campaign.**

**During 2020, we all experienced the ongoing effects of the coronavirus pandemic since mid-March, as we saw businesses forced to downsize due to health concerns, which caused a lot of difficulties for Americans, American workers, America's businesses and America's economy.**

However, on the positive side in 2020, our campaign did promote our new effort, the declaration of December as National Small Business Month, which urged people to shop at local businesses that help employ over 60 million people across the United States. For a first time effort this was a great success.

Special thanks to the television and radio broadcasters, organization leaders and individuals who have spread our message to support local businesses during December, National Small Business Month. Their participation has been very important, and I hope that you see and hear your local media promoting local small businesses more than ever before.

**With your help, our grass-roots efforts, radio, Internet and newspaper commentaries, along with millions of Americans spreading the word, we are bringing about positive changes. Thanks for your participation.**

On behalf of everyone involved promoting American Workers Need You and the **Buy American Made Campaign, Happy New Year to you and yours and thanks for spreading the information about our efforts to your family and friends. Working Together WE Will Make 2021 a Great Year for American Workers.**

**Resolutions We Can All Keep!**

Most of us made some sort of **2021 NEW YEAR'S RESOLUTIONS and there are Two RESOLUTIONS we can all keep.** First, "Enjoy Family and Friends because TIME MOVES FORWARD QUICKLY." The second is to support businesses that provide jobs for Americans which benefits our family, friends and country.

These are resolutions we can be proud to keep because they remind us of the importance of family and friends, and the need to help our fellow Americans remain employed and able to support themselves.

As we begin the New Year, we ask that you support fellow Americans taking the following actions:

- 1. Before making a purchase, look at the tags and packaging to see exactly where the item was made.** If you don't find a reasonable selection of American made among the items you're looking for, bring your concerns to the store personnel.
- 2. Contact family and friends and ask them to support the Buy American Made Campaign.** We all want to see the job situation improve in the United States, and one major way we can help expand and restore employment opportunities is to shop at businesses offering a reasonable selection of American made items.
- 3. Go out of your way to shop at your local businesses.** Supporting your local businesses helps maintain more than 60 million jobs across the United States of America. Our resolutions are focused on a 50/50 balance between foreign and American made items sold wherever we shop.
